Skills

Software and programming language

- LISABETA: Added several waveform modules. Also, experienced user and frequently edits it to suit a given project's needs. It provides a complete LISA response and Bayesian inference primarily using the PTMCMC sampler.
- Eryn: I have performed reversible jump MCMC with this sampler in LISABETA.
- Mathematica: Frequent user to do analysis and plotting.
- Python: I mainly use this programming language to perform analysis and make plots.
